

# Townsville Bulk Sugar Terminal

# Townsville Bulk Sugar Terminal

STL owns and operates six bulk commodity terminals located at ports on the Queensland coast between Cairns and Bundaberg.

Each terminal is purpose-built for handling bulk commodities with safe, efficient and reliable infrastructure, mobile plant and equipment. Mobile plant includes large Front End Loaders and Excavators to achieve average shipping rates of around 1,200 tonnes per hour.

Each terminal is staffed with a highly experienced workforce that operate 24/7, 365 days per year to serve our customers. The operators are supported by on-site mechanical and electrical tradespeople to keep the plant running in the event of a breakdown, maximising plant availability and throughput.

Product quality is maintained by a range of assurance measures, including metal detectors on receiving and shipping conveyors, certified weighing and sampling systems, fire protection and vermin control.

## Townsville

Lennon Drive, South Townsville QLD 4810

**Receiving Method** Heavy Rail

**Number of Sheds** 3

**Storage Capacity** 750,000 tonnes

### Shipping Restrictions

Maximum LOA 238.00 metres

Maximum Beam 32.30 metres

Berth Depth at LAT 11.80 metres

Channel Depth at LAT 11.50 metres
